# Mediadent v8 Mobile Viewer

Mediadent is a universal program that controls any digital imaging system. It is known for its ease of use and supports over **50 digital devices** from intra-oral sensors to panoramic and cephalometric X-ray devices (2D and 3D) and any patient management system can link to Mediadent.
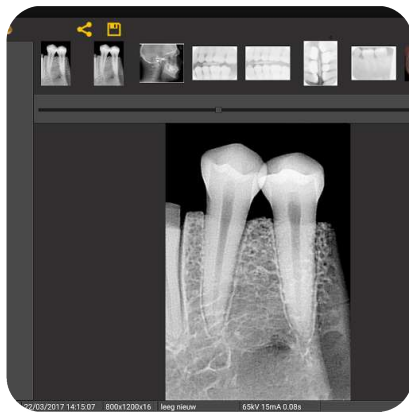

The new **Mediadent Mobile viewer** offers the possibility to show the patient's images on your tablet (Android or iOS).

Download the **ilMobileViewer app** and show the patient's images on your tablet!

## VIEW YOUR IMAGES ON YOUR IPAD OR TABLET

The patient can be sitting in the chair as you discuss the diagnosis.

Instead of showing the patient's image at your desk by turning the monitor, you can **directly** show the images on your **tablet**.

## WORKING OFF LINE

Because you are not always connected, working off line is possible. The new Mobile viewer will **store** the images of the **5 most recent patients** on your tablet.

# Mediadent v8 Mobile Viewer

## EASY SWITCH BETWEEN PATIENTS

The new Mobile viewer will automatically switch between patients because it is in **constant communication** with your main PC.

Switch to another patient on your main PC and the Mobile viewer will follow.

## ENHANCE THE IMAGE QUALITY ON YOUR IPAD OR TABLET

With the **zoom function** you can zoom into particular areas. For more detail, show the image full screen.

If something is not clear, change the **brightness/contrast** for better image quality.

The **Mediadent v8 Mobile viewer** is an optional module.

For more information contact your local distributor.
